PERSONAL SUMMARY

Software Developer with 2+ years of experience building enterprise applications, REST APIs, and AI-powered solutions using Python, FastAPI, PostgreSQL, Laravel, and React. Skilled in AI agents, RAG, vector databases, LLM integrations, backend architecture, and API development.

SKILLS

Languages: Python, PHP, SQL

Backend: FastAPI, Django, Laravel, REST APIs, MVC Architecture, Eloquent ORM

AI/GenAI: AI Agents, RAG, LLM Integrations, Embeddings, Vector Databases

Databases: PostgreSQL, MySQL

Frontend: HTML, CSS, JavaScript, Tailwind CSS, Bootstrap

Security: Authentication, Authorization, RBAC, Middleware

API & Testing: RESTful APIs, Postman, Git, GitHub

Core: Object-Oriented Programming, Database optimization, Debugging

WORK EXPERIENCE

Backend Developer | Sevitsil *June 2026 – Present*

WhatsApp Unified Inbox | *Python, FastAPI, PostgreSQL, Redis, React, Meta WhatsApp Cloud API, WebSockets*

- Built a multi-tenant WhatsApp platform with a shared team inbox, CRM, role-based access, analytics, and real-time messaging.
- Developed webhook processing to handle message deduplication, tenant isolation, customer matching, auto-assignment, and WebSocket-based live updates.
- Added JWT authentication, RBAC, encrypted credentials, and retry handling for reliable WhatsApp API communication.
- Improved the conversations API from ~15s to ~2.5s (~6× faster) by removing N+1 queries, optimizing database access, and adding caching.

AI Analytics – AI Voice Call Analysis | *Python, FastAPI, PostgreSQL, pgvector, Redis, ARQ, Gemini, ElevenLabs*

- Built an AI platform that transcribes and analyzes sales and support calls, scoring agent performance across 8 areas and generating actionable feedback.
- Used Hybrid RAG with pgvector to combine call history, behavioral data, and semantic search for tracking agent performance over time.
- Implemented background processing with Redis/ARQ, including retries, idempotent jobs, and separate processing stages for reliable AI analysis.

AI Automation – Auto Publisher | *Python, FastAPI, React, PostgreSQL, Gemini, NVIDIA FLUX, Meta Graph API*

- Built an AI-based social media platform that finds trending topics, generates content and images, and publishes posts across Facebook, Instagram, and LinkedIn.
- Developed content generation using Gemini, RAG, embeddings, and vector search, with separate workflows for trend-based and voice/text content creation.
- Added background processing, WebSockets, retry handling, and provider-based integrations to make content generation and publishing more reliable.

Backend Developer | TechnoBren Infotech Pvt. Ltd. *March 2025 – June 2026*

- Developed and maintained a large-scale ERP system handling high-volume business data and complex enterprise workflows.
- Worked on ERP Version 1 built with Core PHP and contributed to Version 2 using Laravel, helping modernize backend architecture and application functionality.
- Developed REST APIs, database-driven modules, authentication, middleware, and RBAC using Laravel, PostgreSQL, MySQL, and Eloquent ORM.
- Built and improved responsive, user-friendly ERP interfaces while optimizing backend logic, database queries, and overall application performance.
- Integrated SAP and EFRIS to automate enterprise workflows, inventory management, and business data exchange.

Software Developer | Digipodium – IT Training & Technology Research Center *June 2024 – March 2025*

- Built full-stack web applications using Python, Django, ORM, REST APIs, and React.js.
- Developed responsive frontend interfaces using React.js, JavaScript, HTML, CSS, and Bootstrap.
- Worked on Django MVT architecture, database models, backend logic, API integration, and application debugging.
- Followed Git-based development workflows and gained hands-on experience with structuring, versioning, and deploying web applications.

EDUCATION

Bachelor of Computer Applications (BCA) | Veer Bahadur Singh Purvanchal University) *2021 – 2024*

CGPA: 7.54 / 10 | Relevant Coursework: Data Structures and Algorithms, Operating Systems, Computer Networks, Database Management Systems
